## Meet the Artist on Thursday, Jan. 30, 2025

**Lecture:** 4:30-5:30 p.m. | Graham, Hillyer Hall

**Reception:** 5:30-6:30 p.m. | Oresman Gallery, Hillyer Hall

This series of mixed-media sculptures reflects the intersection of natural and built environments. Discarded electronic components are paired with geological minerals — materials extracted to drive technological advancement — creating a dialogue between progress and its environmental toll. This exhibition invites viewers to contemplate the intricate connections between humanity's pursuit of progress and the landscapes left in its wake.
